

LG Tone Active HBS-850 Speaker Replacement

Written By: Faizan Naveed

TOOLS:

- [iFixit Opening Picks set of 6](#) (1)
 - [Pry Bar](#) (1)
 - [Tweezers](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
 - [Soldering Station](#) (1)
-

Step 1 — Locate Hidden Screw

- Locate the hidden screw as seen in the picture and remove the rubber covering the screw.

Step 2 — Remove Hidden Screw

- Remove hidden screw using a Philips #00 screwdriver.

Step 3 — Pry Open Speaker Housing

- Use a guitar pick or any pry opening tool to gently lift the housing until the speaker end. There is a hidden screw that needs to be removed before the housing can be completely removed.

Step 4 — Locate Hidden Speaker Screw

- Gently remove the pointy rubber covering using tweezers where the speaker rests as shown in the picture.

Step 5 — Remove Hidden Speaker Screw

- Use a Philips #00 screwdriver to remove the hidden screw.

Step 6 — Remove Speaker Screw

- Remove the screw holding the speaker in place using a Philips #00 screwdriver.

Step 7 — Desolder Speaker

- Desolder speaker connection using a soldering iron and replace with new speaker.

To reassemble your device, follow these instructions in reverse order.
